Dr Caitríona Ryan
Senior Post-Doctoral Researcher
I-Form Advanced Manufacturing Research Centre
Maynooth University Hamilton Institute
Maynooth University, Maynooth, Co. Kildare, Ireland.

Dear Tríona

I am writing to invite you to visit Monash University in 2020 to work on new statistical methods in advanced manufacturing with me and others in my research group. I understand you plan to visit Queensland University of Technology in Brisbane. We would be happy to cover the domestic flights between Brisbane and Melbourne, and accommodation in Melbourne for up to 5 nights.

As you know, I have been working on algorithms for anomaly detection in large collections of time series data. I hope we can join forces and work on some new algorithms designed for the type of data you analyse with the I-Form group.

If the timing suited, it would also be good to have you speak in our departmental seminar series in a topic of your choice.

Best wishes
